

Iffat Hossain

Software Engineer|Full Stack Developer

New York, NY | Iffat Hossain | <https://github.com/Iffat77> | <https://www.linkedin.com/in/iffathossaindev/> |

As a Software Engineer I am motivated by finding innovative and efficient ways to improve products that impact people's daily lives. Collaborating is deeply important to me; having accessible code for my peers to interact with and making sure every teammate's voice is heard throughout the process leads to optimal results. I pride myself on contributing creative ideas, an ability to actively listen, and dedication for my craft.

Skills

React.js, JavaScript, HTML, CSS, Node.js, Express.js, MongoDB, Mongoose, Python, Django, PostgreSQL, Git, Github

Projects

GuessWork : A game in which users can play with a friend or solo with options to select a random word and guess it or write in their own word that a second player can guess. The objective would be to guess the word before your tries run out. This app was built using vanilla javascript and uses axios call to fetch the random words from an api.

GitHub repo: <https://github.com/Iffat77/frontend-game/blob/main/script.js>

NYC Architecture : A full stack application which allows users to browse through a list of the current top-10 tallest buildings in New York City as well as an archive of some iconic buildings. In the Iconic section of the app users are able to create and add their own post for what they would consider an iconic structure. This application was created in collaboration with 2 other engineering fellows, and was built using the mern stack and a rest api.

Experience

General Assembly, New York, NY

Software Engineering Fellow, February 2022-June 2022

- Enrolled in an immersive program that focuses on building full stack web applications utilizing the MERN stack and CRUD functionality, along with Python and SQL.
- Learned to work with Git Version Control, Github.
- Worked on team projects with other fellow engineers, as well as working with tight deadlines.

Lime, New York, NY

Mechanic/ Operations Specialist, February 2021- January 2022

- Assemble, maintain and repair Lime product lines as they're assigned
- Perform all the type of repairs from a screw tightening to the most complicated electronic part replacement

Education

General Assembly ; Software Engineering Immersive; Certification June 2022
